

INDIE Protect

**Insurance that stays useful after
purchase**

See what you have. Compare what matters. Know
who owns the next step when you claim.

IndusInd General Insurance x E Cell IIT Guwahati

Capstone submission | July 2026

Buying insurance is easy. Understanding it is not.

Customers can buy in minutes, yet still struggle to find their cover, exclusions, renewal date, or claim owner when it matters.

Where the journey breaks

DISCOVER

Price is clear, suitability is not

People see premiums before they understand what is missing.

MANAGE

Policies are scattered

Documents, exclusions, and renewal dates sit in different places.

CLAIM

A stressful moment becomes a document search

The customer cannot see who owns the claim or what happens next.

RENEW

The reminder asks for payment

It rarely helps the customer decide whether the cover is still right.

Ananya has insurance. She still does not feel protected.

She owns a car policy and family health cover, but has no simple way to see what is covered or what needs attention.

PRIMARY PERSONA

Ananya Rao, 31

Product manager | Bengaluru | INDIE salary customer

OWNS Car policy + family health cover

BEHAVIOUR Mobile first, compares before buying

TRIGGER Motor renewal due; parents ageing

FRUSTRATION Does not know what is covered until a claim

JOB TO BE DONE "Show me what I have, what I am missing, and what to do when something goes wrong."

Begin with 15M INDIE retail accounts

Motor and health provide clear renewal and claim moments. They are a practical place to prove value before adding more categories.

Reach funnel

Assumption: SOM = 10% of SAM in three years.

WHY MOTOR AND HEALTH

1

A regular trigger

Motor renewal creates a predictable annual moment.

2

A costly gap

Low health cover can put household savings at risk.

3

The same core jobs

Both require comparison, documents, claims, and renewal.

Illustrative premium throughput at SOM

Rs. 1,200 crore each year

1.5M customers x assumed Rs. 8,000 annual premium. This is premium throughput, not revenue.

Others help customers buy. INDIE Protect stays for the full journey.

The opportunity is to connect policies, useful reminders, claims, and support inside a banking app customers already use.

PLAYER	COMPARE AND BUY	UNIFIED VAULT	USEFUL BANK CONTEXT	CLAIMS AND RENEWAL	SERVICES
Policybazaar	Strong	Partial	Not offered	Partial	Not offered
ACKO	Own and partners	Partial	Not offered	Strong	Strong
Digit	Own products	Not offered	Not offered	Strong	Partial
IndusInd today	Own products	Own only	Not offered	Strong	Partial
INDIE Protect	Strong	Cross insurer	Strong	Strong	Strong

Bank advantage

Use consented bank context to spot a real need, explain the choice, and let the customer act in the same place.

Know what you have. Choose what fits. Get help when it matters.

INDIE Protect gives customers one place to understand cover, take action, and follow a claim.

KNOW

See every policy and gap

A protection score, plain language summaries, and one vault for every policy.

COVER

Compare the details that matter

Matched choices, clear exclusions, and secure purchase through INDIE.

ACT

Get help with clear ownership

Guided claims, visible status, renewals, roadside assistance, and telemedicine.

CUSTOMER VALUE

Confidence before purchase and control during a claim

BANK VALUE

More useful visits, stronger retention, and relevant offers

INSURER VALUE

Cleaner intake, stronger engagement, fewer avoidable lapses

Each useful action makes the next one easier

The journey keeps policy context together while keeping bank data out of underwriting and claim decisions.

THE LOOP

What the customer does next can improve future prompts. It must never influence underwriting or the outcome of a claim.

Home tells Ananya what needs attention now

The first screen shows her protection score, upcoming renewal, active policies, and the fastest route to help.

1 Protection score

A quick view of what is covered and what needs attention.

2 Renewal due

The date, no claim bonus, and next action appear together.

3 One policy vault

IndusInd and external policies sit in the same view.

4 Consent control

Connected data helps find gaps; the customer can remove access.

Show the real choice, not just the cheapest premium

Customers compare fit, insured value, useful add ons, exclusions, and price before they confirm a simulated purchase.

← Explore plans

Compare without the fine-print fog

The differences that affect your claim payout and out-of-pocket cost, side by side.

Plan	Drive Smart Rs. 6,840 per year	Best fit Drive Total Rs. 8,990 per year	Motor Flex Rs. 7,520 per year
Fit score	87%	94%	82%
Insured value	Rs. 7.5 lakh IDV	Rs. 7.5 lakh IDV	Rs. 7.2 lakh IDV
Zero depreciation	✗ Not included	✓ Included	✓ Included
Roadside assistance	✓ Included	✓ Included	✗ Not included
Cashless repair	✓ Included	✓ Included	✓ Included

Why this matters

Rs. 179 each month makes the upgrade cost clear.

Trust pattern

Coverage and exclusions stay visible before confirmation.

Very good: some minor issues

Your car is under five years old, so zero depreciation can materially reduce what you pay during a parts-heavy claim. The higher premium is Rs. 179/month more than Drive Smart.

A claim should always show what happens next and who owns it

The flow asks for only the evidence needed, shows the current owner, and explains policy wording in plain language.

1 Three step intake

Incident, evidence, and confirmation. Ask only for what is needed.

2 Visible ownership

The customer sees the current team, action, and expected update.

3 Plain language support

The assistant explains terms and always links back to the policy wording.

Prototype behaviour

Claim updates are simulated so the full journey can be tested without live insurer systems.

Build the trust basics before adding more categories

The first release favours the features customers need to understand cover, renew on time, and finish a claim.

FEATURE		REACH	IMPACT	CONF.	EFFORT	RICE
Unified policy vault	MUST	9	3.0	85%	2	11.5
Guided motor claims	MUST	8	3.0	90%	2	10.8
Renewal nudges and autopay	MUST	9	2.0	90%	2	8.1
Transparent comparison	MUST	8	2.0	85%	2	6.8
Protection score	SHOULD	7	2.0	70%	2	4.9
Policy explanations	SHOULD	6	2.0	65%	3	2.6

OUT OF MVP

Real time telematics, automated fraud decisions, pet and rental cover, and autonomous claim decisions.

Measure useful protection actions, not app opens

The main measure counts actions that improve protection. Trust and claim quality remain firm guardrails.

NORTH STAR METRIC

Monthly Protected Actions per Active Insured Customer

Examples: gap review, policy import, purchase, renewal, claim step, or assistance request.

ADOPTION

- Quote conversion
- Policies imported per user
- New insured customers

LIFECYCLE

- Renewal completion rate
- Claim step completion
- Monthly protected actions

TRUST

- Coverage comprehension
- Claim CSAT / NPS
- Repeat support contacts

GUARDRAILS

- Complaint rate
- Consent opt out rate
- Claim TAT and leakage

Pilot target

10% more completed renewals and 20% fewer claim status support contacts versus a matched control.

Offer cover when the need is real and visible

Start inside INDIE with clear consent. Compare the result with a holdout group so the team can see what actually changed.

MOTOR

Renewal or vehicle signal

Policy premium detected, FASTag activity, or a car loan milestone.

Review cover

HEALTH

Family protection gap

Salary customer with dependants and low declared base cover.

Check health gap

TRAVEL

Upcoming trip

Forex, travel card, or ticket activity with explicit consent.

Offer trip cover

90 day pilot design

AUDIENCE

100K eligible retail customers

Bengaluru + Mumbai; motor renewal window

CHANNELS

INDIE home, inbox, RM assist

No unsolicited cold call dependency

TEST

Personalised vs generic vs holdout

Measure incremental quote, renewal, and trust

Prove motor and health first. Then widen the offer.

Add each new capability only after the customer journey and service operation work reliably.

ARCHITECTURE PRINCIPLE

Consent and policy data

Protection orchestration

Insurers and service partners

Auditable events across
every layer

Launch a focused pilot and make trust measurable

Run a 12 week motor and health pilot inside INDIE. Judge it by useful actions, completed renewals, and confidence during claims.

Biased recommendations

Rank by customer fit and disclose commercial relationships.

Sensitive data overreach

Use specific consent, collect less data, and make access easy to revoke.

Wrong policy answer

Use approved policy wording, show the source, and offer human help.

Claim status mismatch

Use the insurer record as truth, with timestamps and clear ownership.

Partner service failure

Set coverage areas, service targets, backup providers, and incident reviews.

RECOMMENDATION

Launch the focused pilot

Motor renewal and health gap discovery
One policy vault
Guided claims with visible ownership
