

INDIE Protect

A bank-native protection cockpit for the complete insurance lifecycle

Discover clearly. Manage every policy. Act with confidence when something goes wrong.

IndusInd General Insurance x E-Cell IIT Guwahati

Capstone submission | July 2026

Insurance fails when customers need clarity most

Low penetration is not only a distribution problem; fragmented discovery, policy language, claims, and renewals erode trust across the lifecycle.

1.0%

base

The customer's real journey

DISCOVER

Too many options, too little context

Comparison optimises price, not protection fit.

MANAGE

Policies live across providers and inboxes

Coverage, exclusions, and renewals stay invisible.

CLAIM

The stressful moment becomes a document hunt

Customers cannot see ownership or the next step.

RENEW

Reminders arrive without advice

Renewal is treated as a payment, not a protection review.

Ananya needs one protection view, not another policy store

Primary persona: digitally confident urban banking customers who own multiple policies but lack a unified way to understand and use them.

PRIMARY PERSONA

Ananya Rao, 31

Product manager | Bengaluru | INDIE salary customer

OWNS

Car policy + family health cover

BEHAVIOUR

Mobile-first, compares before buying

TRIGGER

Motor renewal due; parents ageing

FRUSTRATION

Does not know what is covered until a claim

JOB TO BE DONE

"Help me understand my protection and take the right action before, during, and after an incident."

Start with 15M INDIE retail accounts and earn the right to expand

A focused motor + health wedge uses existing customer trust and digital reach, then expands into a unified protection ecosystem.

Reach funnel

Assumption: SOM = 10% of SAM in three years.

WHY MOTOR + HEALTH

1

High-frequency trigger

Motor renewal creates a predictable annual moment.

2

High-stakes gap

Health underinsurance threatens household savings.

3

Shared lifecycle

Both need discovery, documents, claims, and renewals.

Illustrative premium throughput at SOM

Rs. 1,200 crore / year

1.5M customers x assumed Rs. 8,000 annual premium. This is premium throughput, not revenue.

Competitors solve transactions; INDIE Protect connects the lifecycle

The whitespace is a consent-led, bank-native experience that unifies external policies, proactive insights, claims, and value-added services.

PLAYER	COMPARE / BUY	UNIFIED VAULT	PROACTIVE BANK INSIGHT	CLAIMS / RENEWAL	SERVICES
Policybazaar	Strong	Partial	-	Partial	-
ACKO	Own / partners	Partial	-	Strong	Strong
Digit	Own products	-	-	Strong	Partial
IndusInd today	Own products	Own only	-	Strong	Partial
INDIE Protect	Strong	Cross-insurer	Strong	Strong	Strong

Strategic edge

Use bank trust and consented context to recommend the next protection action, then complete it in the same experience.

Know. Cover. Act.

INDIE Protect transforms insurance from a policy transaction into an ongoing protection service.

KNOW

See every policy and gap

A protection score, plain-language summaries, and a cross-insurer policy vault.

COVER

Choose with transparent trade-offs

Profile-matched recommendations, side-by-side comparison, and secure bank-linked purchase.

ACT

Get help with clear ownership

Guided claims, visible status, renewals, roadside assistance, and telemedicine.

CUSTOMER VALUE

Confidence before purchase and control during a claim

BANK VALUE

Higher adoption, retention, and relevant cross-sell

INSURER VALUE

Cleaner intake, stronger engagement, fewer avoidable lapses

The experience creates a repeatable protection loop

Each stage produces a useful action and better context for the next stage, without turning sensitive bank data into a claim decision.

THE LOOP

Every protected action improves the next recommendation, but underwriting and claim decisions remain purpose-limited and explainable.

The dashboard turns fragmented cover into clear next actions

The home experience is not a product catalogue. It prioritises protection gaps, imminent renewals, policies, and immediate help.

1 Protection score

One number converts passive ownership into an improvement path.

2 Renewal urgency

The due date, no-claim bonus, and action appear together.

3 Cross-insurer vault

Customers can manage IndusInd and external policies in one view.

4 Consent control

Connected data helps find gaps; the customer can remove access.

Comparison makes trade-offs visible before purchase

Customers see fit, insured value, add-ons, and exclusions in the same decision surface, then complete a simulated bank-linked checkout.

← Explore plans

Compare without the fine-print fog

The differences that affect your claim payout and out-of-pocket cost, side by side.

Plan	Drive Smart Rs. 6,840 per year	Best fit Drive Total Rs. 8,990 per year	Motor Flex Rs. 7,520 per year
Fit score	87%	94%	82%
Insured value	Rs. 7.5 lakh IDV	Rs. 7.5 lakh IDV	Rs. 7.2 lakh IDV
Zero depreciation	✗ Not included	✓ Included	✓ Included
Roadside assistance	✓ Included	✓ Included	✗ Not included
Cashless repair	✓ Included	✓ Included	✓ Included

Why this matters

Rs. 179/month makes the upgrade cost tangible.

Trust pattern

Coverage and exclusions stay visible before confirmation.

Your car is under five years old, so zero depreciation can materially reduce what you pay during a parts-heavy claim. The higher premium is Rs. 179/month more than Drive Smart.

Claims show ownership, evidence, and the next step

A guided intake reduces document anxiety; tracking states who owns the claim; Protect AI explains policy language using the customer's context.

1 Three-step intake

Incident, evidence, and confirmation. Ask only for what is needed.

2 Visible ownership

The customer sees the current team, action, and expected update.

3 Plain-language support

AI explains terms and documents but links decisions back to policy wording.

Prototype behaviour

Claim updates are simulated so evaluators can walk through the full lifecycle without backend integrations.

The MVP prioritises trust-building actions over feature breadth

Illustrative RICE scoring favours features that improve lifecycle completion with manageable integration effort.

FEATURE		REACH	IMPACT	CONF.	EFFORT	RICE
Unified policy vault	MUST	9	3.0	85%	2	11.5
Guided motor claims	MUST	8	3.0	90%	2	10.8
Renewal nudges + autopay	MUST	9	2.0	90%	2	8.1
Transparent comparison	MUST	8	2.0	85%	2	6.8
Protection score	SHOULD	7	2.0	70%	2	4.9
Protect AI explanations	SHOULD	6	2.0	65%	3	2.6

OUT OF MVP

Real-time telematics, automated fraud decisions, pet/rental cover, and fully autonomous claim adjudication.

Protected actions are the leading indicator of long-term value

The north star rewards useful lifecycle behaviour, while trust and loss-related guardrails prevent growth at the customer's expense.

NORTH STAR METRIC

Monthly Protected Actions per Active Insured Customer

Examples: gap review, policy import, purchase, renewal, claim step, or assistance request.

ADOPTION

- Quote-to-purchase conversion
- Policies imported per user
- New insured customers

LIFECYCLE

- Renewal completion rate
- Claim step completion
- Monthly protected actions

TRUST

- Coverage comprehension
- Claim CSAT / NPS
- Support repeat-contact rate

GUARDRAILS

- Complaint rate
- Consent opt-out rate
- Claim TAT and leakage

Pilot target

+10% renewal completion and -20% claim-status support contacts versus matched control.

Bank signals create high-intent distribution moments

Launch inside INDIE with consented, contextual prompts. Measure incremental protection actions against a holdout group.

MOTOR

Renewal or vehicle signal

Policy premium detected, FASTag activity, or car-loan milestone.

Review cover

HEALTH

Family protection gap

Salary customer with dependants and low declared base cover.

Check health gap

TRAVEL

Upcoming trip

Forex, travel card, or ticket-related intent with explicit consent.

Offer trip cover

90-day pilot design

AUDIENCE

100K eligible retail customers

Bengaluru + Mumbai; motor renewal window

CHANNELS

INDIE home, inbox, RM assist

No unsolicited cold-call dependency

TEST

Personalised vs generic vs holdout

Measure incremental quote, renewal, and trust

Prove motor and health value before scaling the ecosystem

Sequence integrations by customer value and operational confidence, not by category count.

ARCHITECTURE PRINCIPLE

Consent + policy data

Protection orchestration

Insurers + service partners

Auditable events across
every layer

Build trust with explainability, consent, and accountable claims

Approve a 12-week motor + health pilot inside INDIE, with success judged on protected actions, renewal lift, and claim confidence.

Mis-selling or biased recommendations

Rank by customer fit; disclose trade-offs and commercial relationships.

Sensitive-data overreach

Purpose-specific consent, minimisation, revocation, and audit logs.

AI hallucination in policy advice

Retrieval from approved wording, citations, guardrails, and human escalation.

Claim-status mismatch

Insurer-system source of truth, timestamps, ownership, and SLA alerts.

Partner service failure

Coverage map, service-level contracts, fallback providers, and incident review.

RECOMMENDATION

Launch the focused pilot

Motor renewal + health-gap discovery
Unified policy vault
Guided claims + visible ownership

WORKING PROTOTYPE

Local demo: <http://localhost:5173>

Public URL to be added after deployment approval.
